

Profile

I am a highly motivated creative professional with a strong drive to produce high-quality products that exceed client expectations, delight users and help a business to succeed. I take an active interest in design, website development and media production and ensure that my skills are kept up-to-date and relevant. Within a role I am comfortable taking the initiative, managing my own time and resources to ensure a project is delivered on time and within budget. I take pride in providing friendly customer service, understanding that for many a new project may be a sizable investment on their part.

Experience

Web Developer

[Root Studio](#) - 2013 - Present

Within an award-winning graphic design agency, the position involved taking a lead role in the development of a range of web-based projects - including country shows, tourism and employee training for nationwide banks. An eye for detail was required to successfully convert Illustrator artwork into living, breathing websites, as well as an understanding of branding, tone-of-voice and design principles. Utilising experience in a range of creative mediums, such as video production and animation, I was able to offer clients a wealth of options to get ahead of their competitors and impress their customers.

Application Developer

[Lovefresh Ltd](#) - 2010 - 2011

Initial responsibilities were to assist in developing the web-application for a start-up focusing on fresh, local produce. The role expanded into user-interface design, including a branding refresh toward the later stages of the project.

Education

University of Lincoln

[BSc Web Technologies](#) - 2011 - 2014

Kett 6th Form

A - Media Studies

A - Computing

B - History
